

PRE-GELATINIZED BP, USP

A white or off white free flowing powder, modified pharmaceutical excipient prepared by processing native starch through gelatinization and drying. This treatment improves its flowability, compressibility, and water absorption properties, making it highly suitable for pharmaceutical formulations.

Applications:

- ❖ Excipient
- ❖ Thickener
- ❖ Stabilizer
- ❖ Acts as moisture retention agent.

Functional Properties:

- ❖ Excellent compressibility
- ❖ Improved flowability
- ❖ Better water absorption capacity

Packing and storage:

- ❖ 25kg/50kg Paper/HDPE bag & It's equivalent.
- ❖ Stored in a cool dry place, away from strong light & high temperature to avoid moisture absorption.
